Opus entry units Bravo Series

Opus BR50-10

The Bravo is a top reading electronic entry unit that provides easy operation for under-desk safes as well as spy protection. The numbers can only be read up close by the operator. The code numbers cannot be "spied on" from the distance.

The Entry Unit features a terminal for an electronic key. The integrated battery compartment in the bottom of the Bravo entry unit opens by moving a slider.

Cable length is approximately 30 cm.

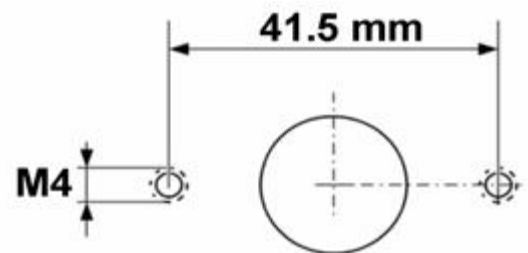

The Bravo entry can be mounted as stationary or turnable model.

The Opus Bravo entry unit is compatible with all Opus/NL electronic locks
